Contents

Abstract **v**

Acknowledgments **vii**

Chapter 1

Introduction **1**

1.1 PDE Approximations and the Computational Bottlenecks 1

1.2 The Suitability of Parallel Computers for PDE-Based Simulations 3

1.3 Parallel Computing for Semiconductor Device Characterization 4

1.4 Organization 4

Chapter 2

Software and Hardware Models **7**

2.1 PDEs and Approximate Solutions 7

2.1.1 Discretization Methods 10

2.2 Computer Software for the Solution of PDEs 14

2.2.1 User Interface 16

2.2.2 Nonlinear and Linear Solutions 16

2.2.3 PDE Approximation (Matrix Formation and Assembly) 18

2.2.4 Data Flow between Major Computational Modules 21

2.3 Coarse-Grain Decomposition for PDE Solution 24

2.3.1 Data Decomposition 25

2.3.2 Program Decomposition 25

2.3.3 Applicability to Existing Codes 29

2.3.4 Suitable Programming Model 29

2.4 High-Performance Parallel Architectures 31

2.4.1 Message-Passing Parallel Computers 31

2.4.2 Shared-Memory Parallel Computers 34

Chapter 3

Coarse-Grain Parallelization of Semiconductor Applications **37**

3.1 Device Characterization: The PISCES Simulator 37

3.2 PISCES Parallelization 40

3.2.1 Previous Parallelization Efforts 41

3.2.2 Applying the Coarse-Grain Parallel Model 42

3.2.2.1 Global Control: Separating Serial Code from Parallel Code43

3.2.2.2 Adding Domain Decomposition45

3.2.2.3 Parallel Data Distribution and Control50

3.2.2.4 Parallel Communication Management53

3.2.2.5 Nonlinear Solver and Initial Guess54

3.2.2.6 Matrix Assembly and Physical Models55

3.2.2.7 Linear Solution Decomposition56

3.2.2.8 Retrospective: Parallel Data Requirements59

3.2.3 Porting Examples: CM-5 and SP1/2..60

3.3 PISCES-MP Results 61

3.3.1 PN Diode 62

3.3.2 Bipolar Transistor 65

3.3.3 CMOS Inverter 68

3.3.4 Photo-Emitter...73

3.4 Framework Generality: FIESTA-HD 76

3.4.1 FIESTA-HD Description 77

3.4.2 FIESTA Parallelization 77

3.4.3 FIESTA-HD Results 78

3.5 Summary..80

Chapter 4

Application-Oriented Gaussian Elimination in PISCES-MP **81**

4.1 Gaussian Elimination and Sparse Matrices 81

4.2 Serial Multi-Frontal Factorization...83

4.2.1 Minimum Degree Reordering and Elimination Tree Creation 84

4.2.2 Symbolic Factorization....91
4.2.3 Matrix Assembly....92
4.2.4 Numeric Factorization....93
4.2.5 Triangular Solve....95
4.2.6 Memory Management....96
4.2.7 Serial Results....97
4.3 Application-Oriented Parallel Factorization....98
4.3.1 Two-Phase Equation Ordering with MMD....101
4.3.2 Distributed Symbolics....105
4.3.3 Matrix Assembly....106
4.3.4 Numeric Factorization....107
4.3.5 Triangular Solve....109
4.3.6 Parallel Results....110
4.4 Summary....119

Chapter 5

An Adaptive Linear Solution Method for PISCES-MP 121

5.1 Solution Strategy....121
5.2 Serial Algorithm....125
5.2.1 Symbolic Factorization....126
5.2.2 Partial Factorization....132
5.2.3 Reducing the Residual....132
5.2.4 The Iterative Step....133
5.2.5 Recovering the Direct Solution....133
5.2.6 Serial Results....134
5.3 Parallel Algorithm....136
5.3.1 Symbolic Factorization....137
5.3.2 Partial Factorization....138
5.3.3 Reducing the Residual....138
5.3.4 The Iterative Step....139
5.3.5 Recovering the Direct Solution....139
5.3.6 Parallel Results....140
5.4 Summary....148

Chapter 6

Summary and Future Work **149**
6.1 Summary 149
6.2 Future Work 151

Bibliography **153**

Appendix A

PISCES-MP Simulation Results **159**

Appendix B

PISCES-MP Direct Solver Results **165**

Appendix C

PISCES-MP Adaptive Linear Solver Results **175**
